

# Three-Panel Flip Chart

A three-panel flip chart is useful when you want to compare the characteristics of three topics. The three-panel flip chart can organize the characteristics of the three topics side by side under the flaps. Similarities and differences between the three topics can then be easily identified.

*See how it's done.*

1. Fold a **piece of paper** in half from the top to the bottom.
2. Fold the paper in thirds from side to side. Then, unfold the paper so that you can see the three sections.
3. From the top of the paper, cut along each of the vertical fold lines to the fold in the middle of the paper. You will now have three flaps.
